PokéDrop UK

Less checking.
More collecting.

A collector platform for Pokémon TCG releases, restocks, exclusive drops and personal rewards.

Created by WhyG & PokeStev

Independent product concept and interactive demo

The chase takes too much checking

UK Pokémon TCG collectors are the starting audience.

01

Unpredictable stock

Limited products can disappear before collectors have time to react.

02

Busy collectors

Work, sleep and everyday life get in the way of checking shop pages.

03

Scattered information

Product news, launch dates and restocks often live across multiple channels.

PokéDrop brings discovery, personal preferences and a planned alert service into one experience.

One place for the next drop

01	**Discover**	Explore products, prices and availability in a searchable catalogue.
02	**Follow**	Build a personal watchlist and keep release dates in view.
03	**Set preferences**	Choose product types, budgets, quantities and notification channels.
04	**Prepare to act**	Review the product at the retailer when the right opportunity arrives.

Current catalogue and calendar entries use labelled sample data. Live monitoring is not connected.

Your collector headquarters

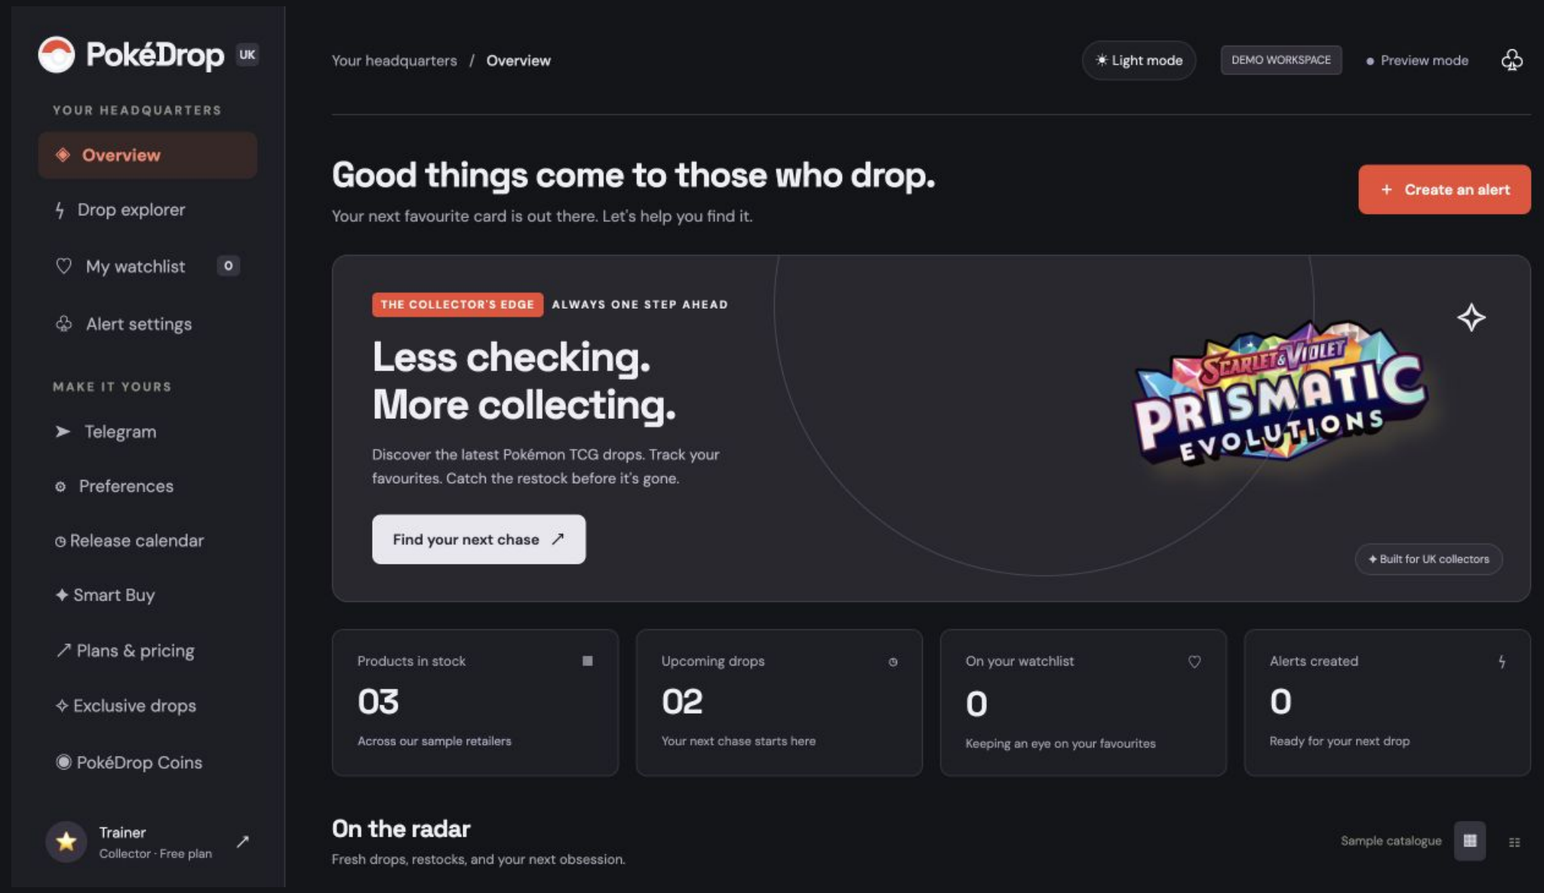

Discovery

Search products and filter sample stock availability.

Personal space

Save a watchlist, customise a trainer profile and switch between light and dark themes.

CURRENT DEMO SCREEN

Live screenshot. Product prices and stock status are illustrative.

Your chase. Your rules.

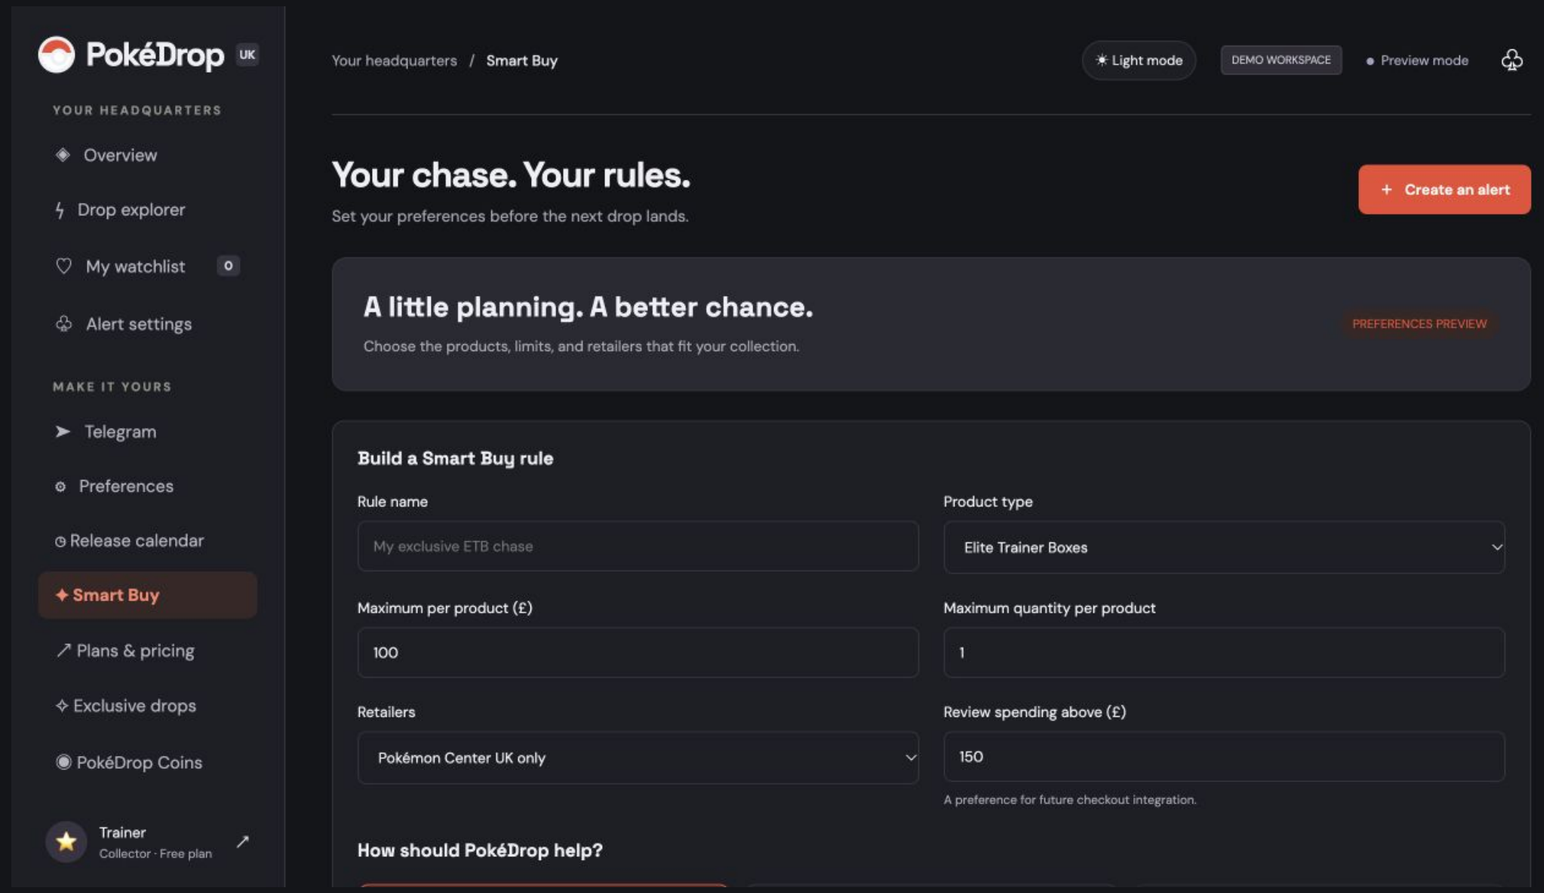

Buying preferences

Set a product budget, maximum quantity and preferred retailers.

Purchase control

Preview alert-only or assisted-checkout preferences. Automatic purchasing remains unavailable.

CURRENT DEMO SCREEN

Rules save locally. Retailer checkout preparation and purchasing are not connected.

Exclusive drops

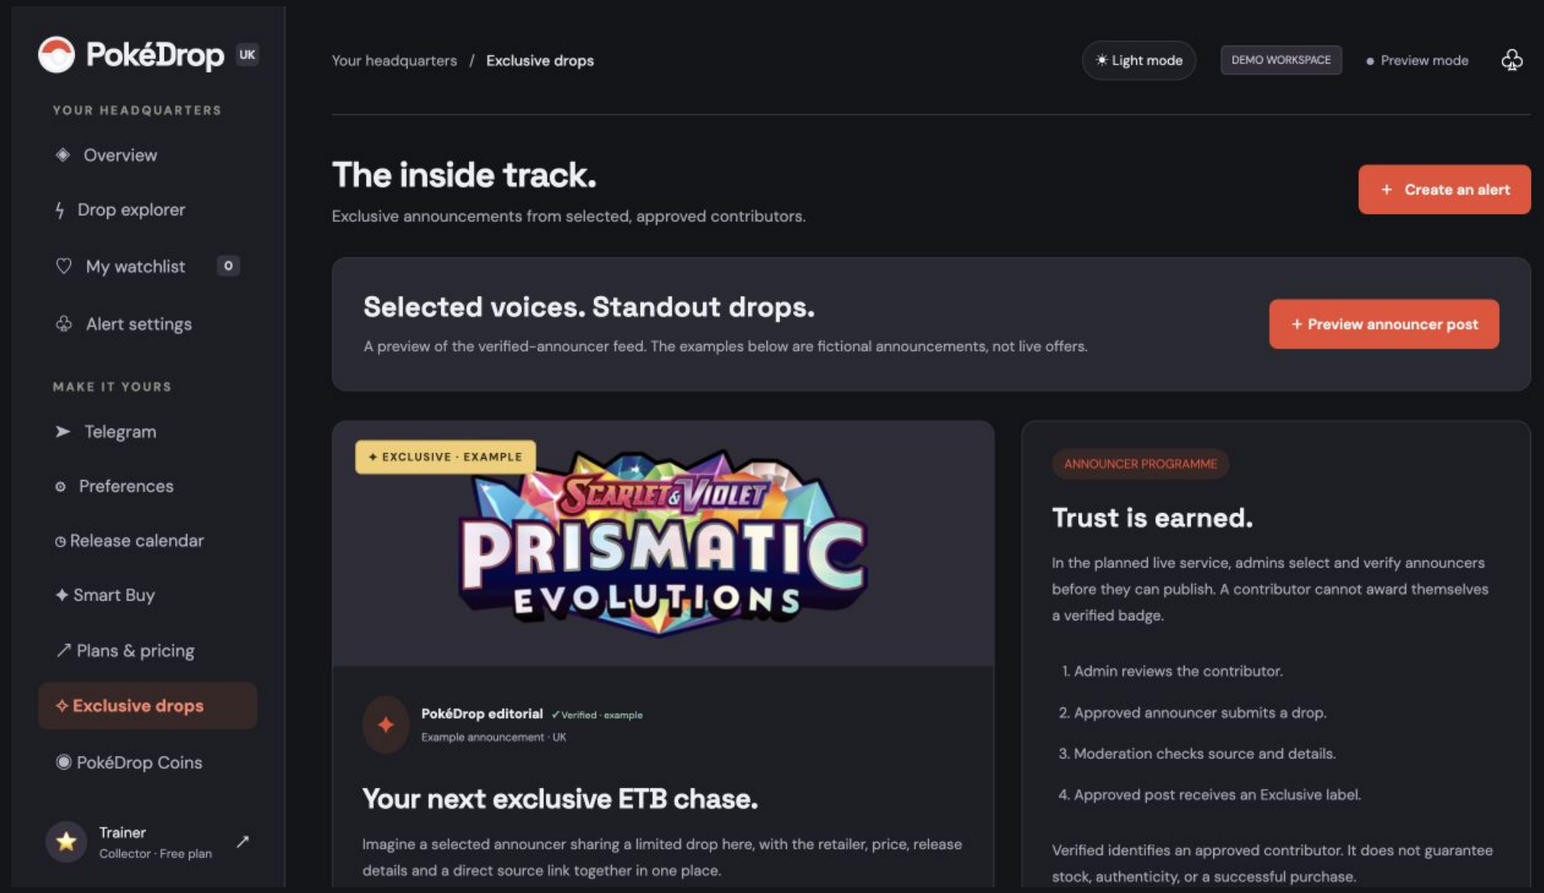

Approved announcers

The planned service lets admins select contributors and review their posts.

Visible provenance

Exclusive labels sit alongside announcer identity, retailer details and source links.

CURRENT DEMO SCREEN

The feed and verified badge shown are fictional examples. Drafts remain private and local.

Rewards for the collection

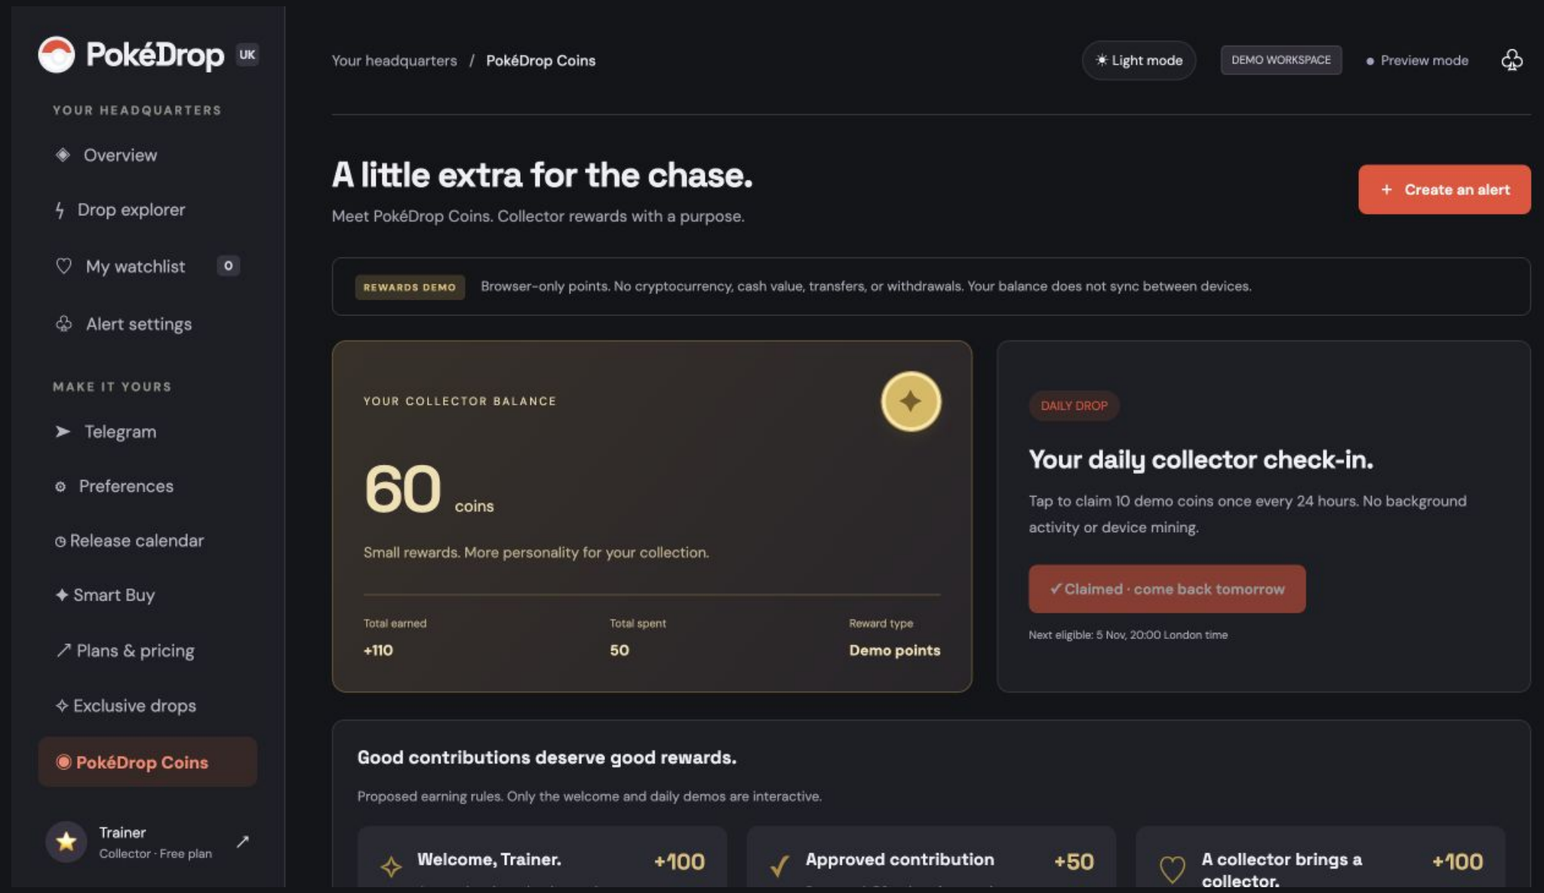

A daily habit

Try a welcome reward and a once-per-24-hours check-in.

Useful rewards

Spend demo coins on trainer cosmetics. Pro passes and partner perks are planned.

CURRENT DEMO SCREEN

Browser-local loyalty points. No cryptocurrency, cash value, transfers or withdrawals.

PokéDrop Coins: earn and redeem

Proposed earning rules

100 — **Welcome reward**
One-time demo claim

10 — **Daily check-in**
Once per rolling 24 hours

50 — **Approved contribution**
Planned, after moderation

100 — **Qualified referral**
Planned, after eligibility checks

Redemption ideas

50 coins
Star trainer badge

150 coins
Golden trainer name

500 coins
7-day Pro pass, proposed and unavailable

Daily claiming allocates points. It does not perform blockchain mining or run a background miner.

Live rewards need verified accounts, server-controlled balances, duplicate prevention and an auditable ledger.

Plans for every collector

Illustrative monthly pricing. Paid subscriptions are not open.

Free

£0

per month

- Basic product notifications
- Limited wishlist
- Release calendar

Pro

£5.99

per month

- Instant alerts
- Unlimited wishlist
- Restock notifications
- Personalised filters

Elite

£12.99

per month

- Advanced drop intelligence
- Multiple regional tracking
- Priority alert delivery
- Smart Buy preferences
- Advanced collection tracking

Feature sets describe the intended paid product. Demo access does not create a subscription or collect payment.

What works today, and what comes next

Available in the private demo

- Product search and sample stock filters
- Local watchlists, profiles and preferences
- Smart Buy rules and exclusive-post drafts
- Demo coin claims, ledger and cosmetics
- Landing page and light/dark app themes

Still to connect

- Customer sign-in and shared data
- Approved product sources and live monitoring
- Telegram, Discord, email and push delivery
- Announcer verification and moderation
- Subscriptions and real reward fulfilment

The static preview runs privately on its own VPS container. A public HTTPS address still needs a domain.

A focused route to the first live beta

01

Accounts and data

Independent sign-in, permissions, server-owned profiles and persistent watchlists.

02

Monitoring and Telegram

Approved sources, duplicate detection, stock-change checks and measured alert delivery.

03

Trusted community and rewards

Admin-approved announcers, moderation, server-controlled balances and redemption controls.

04

Collector beta and subscriptions

Test with collectors, measure reliability, then connect paid plans and reward fulfilment.

Automatic purchasing depends on a permitted retailer integration. No checkout automation runs in the demo.
